# Access management software

eXguard PRO is a fully featured Access Management PC software application that combines the latest in TDSi innovation and user-friendliness in one package. Supporting up to 128 doors as standard with the option to extend this with an unlimited door licence, eXguard PRO meets the needs of even the largest of access control networks. With eXguard PRO integration and expansion are key features and there are numerous possibilities to integrate with the latest CCTV and biometric technologies. eXguard PRO also supports, as standard, the ever popular MicroGarde controller adding even more potential.

Features of eXguard PRO

- Integration capability with leading manufacturers of DVR equipment and biometric readers
- Custom site graphics with animated icons for instant visibility of information
- Fully configurable automated database backup facility
- Numerous communication methods including TCP/IP, dial-up and GSM modems
- Detailed context sensitive help system
- Personnel image capture and Photo ID badge design and print
- Multiple workstation capabilities (subject to license)
- Advanced prioritised alarm handling for optimum operator response time
- Integration to 3rd party ODBC databases (using eXFusion or Microsoft® OPC server), building management, fire and intruder systems

Benefits of eXguard PRO software

- Provides a fully integrated security solution meaning that you will only ever have to manage one software platform
- Windows® 2000 and Windows® XP application for maximum security
- SQL Base database allows for maintenance-free operation
- Automated back-up feature provides peace of mind should things go wrong
- Backwardly compatible with previous ranges of TDSi controllers meaning that there is no need to upgrade the hardware
- Installation and commissioning is simplicity in itself minimising the effort required to start using the software
