

remote notification

Remote Notification

The remote notification module for EXgarde provides a simple and effective method of communicating events to your security and management personnel using wireless PDA's, SMS or email alerts. This provides an effective method of informing the relevant people of critical information when it occurs, such as door forced alarms.

remote notification

DS0078_Issue 2

FEATURES AND BENEFITS

Trigger notification from any event

Provides flexibility to add a notification to any event within the system.

Provide multiple notification nodes

Allows different events to be transmitted to different groups of people.

Utilise different notification methods

Allows you to use Wi-Fi, SMS and email for flexibility.

Proactively manage security risks

Keep tab on risk events such as repeated access denied to identify concerns early.

Link with CCTV tracking for identification purposes

Utilise notification with CCTV tracking to identify potential culprits.
