JABLOTRON
CREATING ALARMS

JA-159J

JA-159J Wireless doorbell button

The product is a wireless system device for the JABLOTRON 100+. Button activation allows you to use the wireless bell function, trigger an emergency alarm or control appliances.

The product occupies one position in the system.

The same printers and principles that are used to print segment labels for the JABLOTRON 100+ keyboards can be used to print labels for the bell button.
