

ATS1831

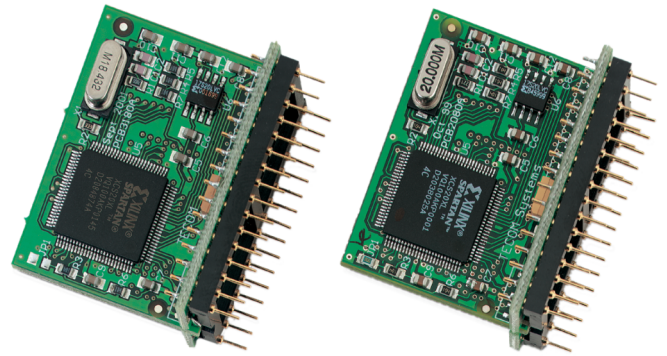

ATS Intelligent User Module (4 MB)

Product Overview

The ATS1831 memory expansion is an option for the ATS4000 control panel to increase the memory capacity with 4Mb up to 17873 users.

Intelligent User Modules

The capacity and flexibility with user access cards can be further enhanced thanks to the optional ATS1831 (4MB) and the ATS1832 (8MB) Intelligent User Modules. IUMs store a full stream of data (up to 48 bits) from a card and are capable of learning and then simultaneously handling several card formats. IUMs also feature a powerful search engine that allows the system to retrieve one user out of 17,000 (4MB) or 65,000 (8MB) in less than 140 milliseconds.

Details

- 4 MB memory
- Intelligent search engine
- Store "full stream of data"
- 17.873 users
- All users with card & PIN
