

# GDA-CO

## Collector Cones for Gas Transmitters

### DESCRIPTION

Stainless Steel collector cone is used to amplify detection area of gas detectors heads up to 26cm diameter.

Typically used for applications where light gases have to be detected, it is also useful for any application where it is recommended to have wider detection areas.

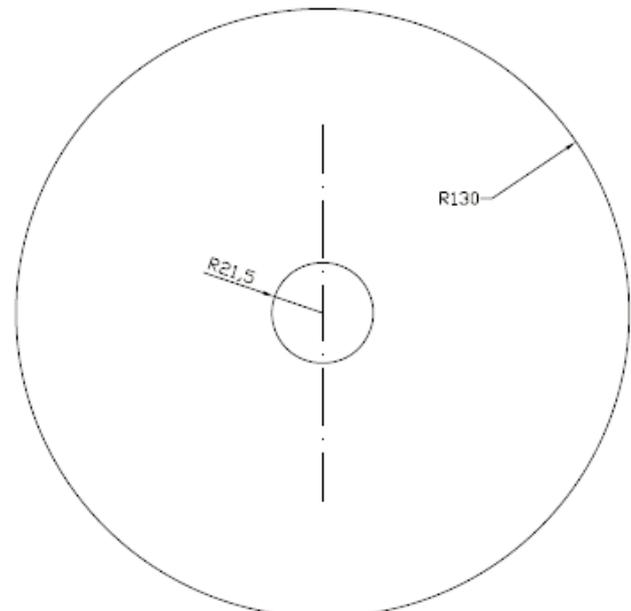

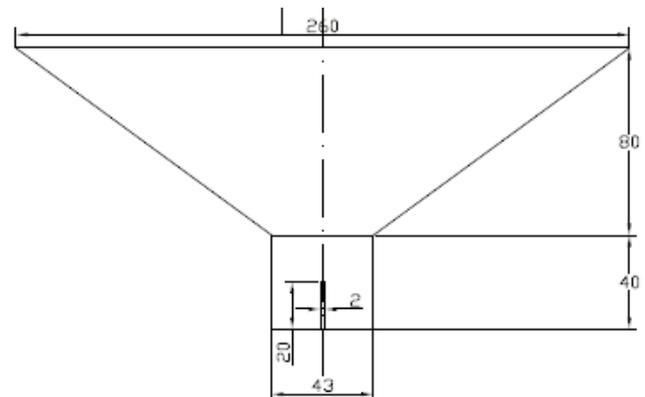

Made of Stainless Steel can be mounted in any kind of environment even in presence of very reactive gases.

### APPLICATIONS:

Commercial, industrial and petrochemical plants.

Danger materials stocking.

Usable in explosive atmospheres or into air extraction ducts.

### MECHANICAL SPECIFICATIONS:

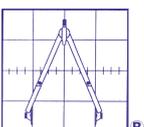

Dimensions: as per drawing.

Weight: 500 g.

Construction Material: Stainless Steel AISI304
